February 2024

Specializing in "Hard to Find" Import & Domestic Parts

NEW PRODUCTS STOCKED IN ALL LOCATIONS!

NEW POWER STEERING

ALL PWR pumps and racks are **NEW** products in the box. Engineered and manufactured for superior performance, reliability, and to boost customer satisfaction! **Plus, no core charges!**

NEW! Power Steering Pumps

- Eliminates drivability issues.
- Addresses original product's premature failure issues.

NEW! Rack and Pinion 

- 100% functional testing of every part.
- Easy, efficient installation for technicians.

BELT TENSIONERS

Litens Accessory Drive Tensioners are engineered to maintain constant tension on the belt, so it doesn't slip and make noise. They dampen the vibrations caused by engine firings, contributing to a smoother driving experience. **95% of what is in the box is OEM!**

- **Consistent Tension:** Eliminates belt slip and noise.
- **Vibration Damping:** Reduces belt vibrations from engine firing.
- **System Tuning:** Ensures proper accessory drive function.
- **Alignment Maintenance:** Keeps the belt properly aligned.

O2 SENSORS

- Leads are guaranteed to be no more than 2" longer than the OEM design.
- OE direct fit connectors.
- 98% vehicle coverage - perfect for older, higher mileage vehicles.
- Exact OE fit, form, and function - 100% OE replacement O2 sensors.
- Extra high temperature sleeving.
- Wide band & air fuel ratio sensors included.

CATALYTIC CONVERTERS

- ✓ Made in the USA
- ✓ Family owned and operated, founded in 1987.
- ✓ Widest catalytic converter coverage in the industry (more than 4,000 SKUs).
- ✓ Specializing in hard to find & late model units.
- ✓ Also offering "first to market" prototype services.
- ✓ Live and virtual tech training available!

Flooded & AGM Batteries

Promax Batteries are engineered for excellent charge acceptance and provide peak power for vehicles with start/stop systems, regenerative braking and support the highest electrical demands of newer vehicles.

- Promax batteries are engineered for excellent charge acceptance and provide peak power for vehicles with stop/start systems, regenerative braking and support the highest electrical demands of newer vehicles.

IN-PERSON TECHNICIAN TRAINING!

DIAGNOSING VEHICLE NETWORKS AND DATA LINES

Taught by Dave Scaler!

When a MIL is lit, the scanner is the normally the first tool to choose to ID DTC's, and data stream. But when the scanner does not communicate or if series network codes are set, it can often leave a tech with no direction. This class is designed to help the technician attack a no communication or U-Code problem with confidence, by learning and understanding how onboard computers are tied together with Multiplex Networks. 1996-2023 Networks covered in this class will include CCD, PCI, Class 2, SCP, CAN, UART and More!! High and Low Speed CAN (Controller Area Networks), is the latest of communications networks and presents its own diagnostic challenges. This class will cover the 2-minute diagnostic test, which will put you quickly on the right path to diagnosing these systems. This class is also a great prep for the ASE L1 exam, as the L1exam also includes CAN communication questions.

2024 TECHNICIAN OF THE YEAR PROGRAM

Incentivize your Technicians to learn & earn more! The Technician of the Year program provides training opportunities and unrivaled high-level awards for technicians. Requirements to become EAPW Technician of the Year are simple. Attend 1 virtual or In-Person training hosted by EAPW, obtain your Alliance Connect log-in credentials, and be ASE Certified through 2024! Interested in more information regarding the Technician of the Year program? Reach out to your EAPW Sales Rep for more information!
