SERVICE DIFFERENCE.

Specializing in "Hard to Find" Import & Domestic Parts

# TOR Brake Pads

- Advance Transfer layer technology for optimal braking performance
- **Multilayer Shim** restores every vehicle to its optimal braking performance
- Hardware for 99% of vehicles in operation

**Engineered and made in North America!** 

**Advanced Friction Materials: Engineered to eliminate noise** and vibration while delivering optimal stopping performance.

and vehicle testing ensures superior stopping performance, noise and wear

**Advanced Friction Formulations Provide Optimal Stopping Power!** 

## OLUTION Brake Pads

#### **Better Braking**

Thermal scorched for a faster break-in as well as chamfered and slotted to ensure noise-free

#### **Dependable Performance**

Positive mold technology delivers consistent wear and performance while the powder coated backing plate resists rust and corrosion.

PRECISION MADE TO FIT YOUR VEHICLE!

# MY**PLACE**4**PARTS**

**Purchase ANY Combination** of Brake Pads and 2 **PerfectStop Rotors** through MYPLACE4PARTS and be entered to win one

of 30 Yeti Backpacks!

# **STOP** ROTORS

PerfectStop Rotors are Engineered to match OE fit, form, and function to the specifications originally designed for the vehicle! PerfectStop Rotors meet or exceed the industry's strictest safety, performance & physical standards.

## **Armor-Plate™ Anti-Corrosion Coating**

On all Non-Friction surfaces for improved corrosion resistance.

## **Cross-cut™ Surface Finish**

For improved pad seating & break-in

### **Precision Engineered**

For reduced vibration and superior stopping power

## **Power-Vent™ Vanes**

For improved brake cooling, decreased fade, and smooth braking

42 Warehouse locations in PA and NJ! One near you eapw.com!

# **IN-PERSON TECHNICIAN TRAINING!**

# Misfire Diagnosis hosted by Standard Motor Products

Many technicians have approached misfire diagnosis by swapping ignition coils or other components between cylinders. Access to these components is challenging on many vehicles, therefore, this technique can be ineffective. This class will identify requirements for combustion to occur such as fuel delivery, ignition, and engine mechanical operation. Then, we will explore various techniques to effectively identify the cause of an engine misfire using scan data and oscilloscope waveform analysis. Case studies will be used to demonstrate these techniques. After completing this class, a technician will be able to; Describe basis combustion principles, Analyze scan tool data, Verify ECM commands for ignition and fuel, interpret oscilloscope waveforms for misfire diagnosis, & Evaluate relative compression results.
