RADIATORS & CONDENSERS

- Vibration testing issued to simulate potholes, curbs, and off-road use.
- Premium-grade materials used for ensuring added product longevity.
- Radiator core is tested prior to assembly.

- Resistant to damage from road debris, vibration and corrosion!
- Designed to meet the performance standards required for the vehicle's AC system to function effectively.
- OSC Condensers are 100% tested up to three times during production.

MotoRad® Thermostats & Integrated Housings

MotoRad integrated thermostat housings differ from traditional thermostats. They offer an all-in-one, bolt-on solution with the thermostat and housing integrated into one unit. This is a growing segment of thermostats with a large number entering the replacement window.

Motorad's Fail-Safe Thermostats automatically lock the valve into a wide-open position to allow coolant to circulate freely. This allows a deteriorating cooling system to activate a precision engineered piston.
